MEMBERS AND CARS

This list contains last name, first name(s), address, post or zipcode, phone, mobile number and e-mail address of members. The car data lists year, model, chassis number, engine number, registration number, coachbuilder, body style and main colour. An asterisk after the engine number indicates that the engine is not the original one fitted to the chassis. The list is based on data received up to 31 December 2014.

We would be grateful if members would check all of their entries in this listing for accuracy and completeness, but particularly to check their e-mail addresses as any errors here will prevent members from receiving the increasing number of Club communications sent by e-mail. (Members without e-mail will continue to receive hard copy of Club documents.)

Registration Cross-Reference

This list enables a car to be identified from registration numbers on cars seen or from photographs which show the registration number. The four fields shown in this list are registration number, chassis number, car type and current (or last known)owner, user or keeper. If a car appears more than once under the same number, this indicates multiple owners, users or keepers. Note that if a registration number has not been supplied, then a car will not appear on this list. A car may appear under different numbers if more than one number has been in use on the car. The list also includes some cars not currently owned by Club members. Usually no name or the last known keeper is shown for these cars. Some cars, mainly from Australia, show the registration number in parenthesis. This indicates that the car runs on a 'Licence to Move' plate rather than a full licence.

CHASSIS CROSS-REFERENCE

This table allows members to find owners of chassis similar to their own. The data are listed by model, chassis number, year and the current or last known owner or keeper. Not all names represent current members of the 20-Ghost Club. As far as possible, the year is the year when the car originally came 'off test'.

SILVER GHOST ENGINE NUMBERS. No separate engine number was shown for early cars. By late 1909 an engine number appeared on the engine build sheet. Initially this was a two or three digit number which was frequently duplicated. From 1911 onwards, the number was stamped on the engine mountings on each side of the motor and a letter was often added to this number but no particular sequence was used. From 1913 when the lettered chassis series were introduced, the engines were also produced in series starting with A (1913), B, C, D, E (1914), F, G (1915), to H (1916). These engine series were not shown on the actual engines. Improvements to the cars from then on were mainly linked to a change in the engine series which usually did not coincide with a change in the chassis series. In 1919, the chassis number letters appeared in some engine numbers but soon a definite system emerged which was stamped on the engine - a one, two or three digit number followed by a letter which represented the Derby series from J (1919), K, L, M and N (1920), O (1921), P (1922), R (1923), S (1924), T (1924) to U series at the end of Derby Silver Ghost production in 1925.

SPRINGFIELD ENGINE NUMBERS. Until 1923, engine numbers were coded to show year of production followed by sequence within year. For example, 22-76 is engine 76, made in 1922. Starting during 1923, engine numbers were coded to show year of production and chassis number. The first and last digit combined to indicate the year, thus 21105 was built in 1925. The second digit was a serial digit and the third and fourth digits were matched to the last two figures in the chassis number; engine 21105 was fitted to chassis S210ML.

20-Ghost Club Trophies

1. Alpine Trophy. One of two cut glass decanters originally given by the Archduke Leopold Salvator of Austria as one of the prizes in the Austrian Alpine Trials in 1913. It was won by C.C. Friese and subsequently presented to the Club by Rolls Royce Ltd. Awarded to the owner of the car which achieves maximum marks between 1 December and the following 30 November for mileage relative to age according to the formula below:-

- The car must be in the possession of the same owner throughout the period in which mileage occurred, but need not be driven by him or her in toto.
- The prize is for the car. Owners of more than one car may enter them separately, but may not aggregate mileage for the trophy.
- One mark is awarded for each mile covered during the period, whether covered on business or pleasure, at home or abroad.
- Mileage is multiplied by the age of the car on 31 December of the year in which each competition commences.

2. Woodmansee Trophy. A pair of book ends in solid brass, the very last of the original 'Silver Lady' mascots cast from the actual sculptor's moulds by Charles and Jo Sykes in 1939. Surplus to the final order, they were subsequently offered by Jo to Rolls-Royce in the early 1950s and accepted and paid for by them. In 1957, at the Concours d'Elegance organised by the 20-Ghost Club as part of the Silver Ghost Jubilee Rally at Buxton, these mascots were donated by Rolls-Royce as first prize, which was won by Webster Woodmansee of Milwaukee, USA, with his 1922 Springfield Silver Ghost Brewster Tourer (62UG) and in 1989 donated back to the Club on its fortieth anniversary. Awarded annually to the owner of the Silver Ghost which travels the greatest distance between 1 December and the following 30 November, or if a Silver Ghost wins the Alpine Trophy, then to the next highest Silver Ghost mileage.

8 Membership and Car Data records

- 8.1 Members are advised that the Club holds personal data of their names and addresses and of their cars on an electronic database. This data is held for internal use and the Club will not divulge such information to third parties, for any commercial purpose, nor will it be released to any other Club or Motoring Organisation.
- 8.2 The Treasurer will maintain, as part of the books of account of the Club, a simple record of all those members from whom payment of their Annual Subscription has been received. With the exception of members of the Australian Chapter of the Club who will maintain their own records of subscriptions received, this will provide the definitive list of paid-up members.
- 8.3 Every Member shall communicate from time to time to the Secretary his address and all notices required by these Rules to be sent or given to Members shall be deemed to have been duly sent or given if sent to such address.
- 8.4 The Chief Archivist will maintain information on Membership and Car Data as an integrated database covering all Members of the Club including those of the Australian Chapter.
- 8.5 The database of Membership and Car Data is held on a secure remote host computer. Access to this host database will be restricted to the Treasurer, Database Manager and Membership Secretary.
- 8.6 Periodically a list of Members and their cars will be printed and sent to each Member. This data is solely for use by Club Members for their personal use and must not be divulged to third parties or used for commercial purposes.
- 8.7 Members who do not wish personal details and/or car data to be printed or held on a remote host computer should notify the Company Secretary, Database Manager and or the Membership Secretary in writing to ensure this information is withheld from the remote host computer or publication.

9. Property

- 9.1 Any item printed with the Club's badge or its electronic equivalent is the Club's property and is issued only to the Treasurer, Chairman, Committee Member or other Club Official for use on the Club's business and affairs. - 9.2 Club Car Badges may be sold to Members for use only on their own pre 1945 Rolls-Royce cars. In very special circumstances, the Committee by unanimous resolution may authorise use of the Club Badge on another type of Member's car.

10. Technical support on tours

- 10.1 Where it is decided to provide technical support, it is suggested that the 20-Ghost Club pays 100% of the engineer's hotel and travel expenses. In some situations, an engineer is prepared to join the tour as a holiday, in which case a small per diem rate might be added. However, in other situations, eg as on the 2013 Alpine Tour, a larger fee may be required to be paid to the company providing the engineer(s). The total cost of providing engineering support (hotel, travel and any fee) should be included in the budgeted costs and reflected in the price of the tour (less an estimate of revenue likely to be earned from significant repair over and above roadside assistance). The total gross cost of providing engineering support (as calculated above before deducting additional revenue) should be divided by the number of days and hours, in order to arrive at an average hourly rate. Where an engineer provides assistance to a

participant in the nature of immediate breakdown support (as might be provided by the AA or RAC) then that support shall be provided free, as part of the price paid to join the tour. Where an engineer provides assistance in the nature of remedial repair, over and above roadside assistance, then the participant should be charged at the above average hourly rate (plus he/she must pay for all parts etc). The 20-Ghost Club will receive (and keep) all such revenue to offset the total gross cost of the engineer joining the tour.

11. Trophies

Except in exceptional circumstances, at the discretion of the Committee, a trophy will not be awarded more than three times to the same person.
